

A perennial that is found in grassy places. It is common in our area and so we have narrowed the numbers down to 16 spread widely. We don't know how long-lived it is here and how well it reproduces. Watch for young seedlings round the parent plant. Flowers from June - September. The seedpod stalks only straighten up when the seed is ripe.

Geranium pratense historical data

4 figure	Site	Grid Ref	Recorder	Date	Number	Comments
4577	Arnside Knott	SD4587077319	AK	06/07/24	several	Layby near Tower Farm
