

Schoenus nigricans is a tussock forming plant of wet and boggy calcareous places. It is only found in a few places in the ASNL.

The main site is at Haweswater.

Schoenus nigricans

4 figure	Site	Grid Ref	Recorder	Date	Number	Comments
4776	Hawes Water Marl	SD4786476764	LF et Al	22/06/23	lots	lots of small clumps that have grown up since the trees were removed
4776	Hawes Water Schoenus field	SD478767	LF et Al	22/06/23	lots	Growing well lbut the bracken and hmp agrimony are crowding some out
4776	Hawes Water boardwalk	SD4789776671	LF et Al	22/06/23	lots	Growing well lbut the bracken and hmp agrimony are crowding some out
