

Herb Paris has been found at over 60 locations in the AONB. We are monitoring a subset of the following 27 plants/groups of plants.

More information about these and the other locations are given in the main spread sheet and individual data sheets.

Paris quadrifolia is an indicator of ancient woodland. It grows very slowly but can form very large clumps,. It dies down completely over winter. It likes damp shady woodland areas.

Its fruit is a single black berry. Count either the individual leaf spikes or give the measurements of the patch.

4 figure	Site	Grid Ref	Recorder	Date	Number	Comments
4377	Frith Wood	SD4381377490	AK	06/05/23	80	on path along edge of Frith Pond
